An Engineering company and an Integrator of Integrated logistic solutions, specialised in the design and development of services and fit for purpose technologies, aimed at creating added value.

INTEGRATED LOGISTICS

Our logistic services offer 360 degrees personalized solutions to meet the most varied needs. Most especially we give the client the chance to outsource the entire logistic-distribution chain thereby reducing fixed cost of infrastructure and personnel as well as other problems connected to store management.

INTEGRATED LOGISTICS

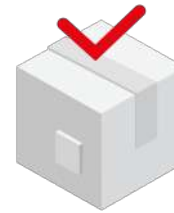

Our mission is to optimize the logistic processes of our customers by guaranteeing a fast and punctual order fulfillment service.

Outsourcing service has a flexible and scalable pay-per-use commercial offer thanks to a planned dedicated area of our warehouse, qualified personnel, an innovative technological platform, competitive shipping rates, a customer care service.

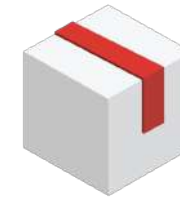

COMPLETE MANAGEMENT OF LOGISTICS FOR E-COMMERCE

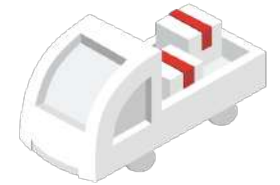

STOCKAGE

PICKING

PACKING

SHIPPING

A complete range of logistic services to improve the management of online sales.

WAREHOUSE MANAGEMENT

Traceability as the keyword for an automated warehouse able to handle packaging requests rapidly and safely. This means speeding up the operations of accumulation, distribution, translation, lifting and picking of goods, increasing the accuracy of operations and decreasing errors and damages, reaching a high level of reliability and obtaining large competitive advantage compared to the best standards used by factories with traditional fixed storage system.

WAREHOUSE MANAGEMENT

Storage activity with calibrated spaces based on the needs of the client. Groupage services, reception and acceptance of goods, touch up, labelling and certified weight.

Stowage and handling services on behalf of third parties, offering them warehouse management software, logistic consultancy aimed at process efficiency and the reduction of storage/packaging costs.

INNOVATION

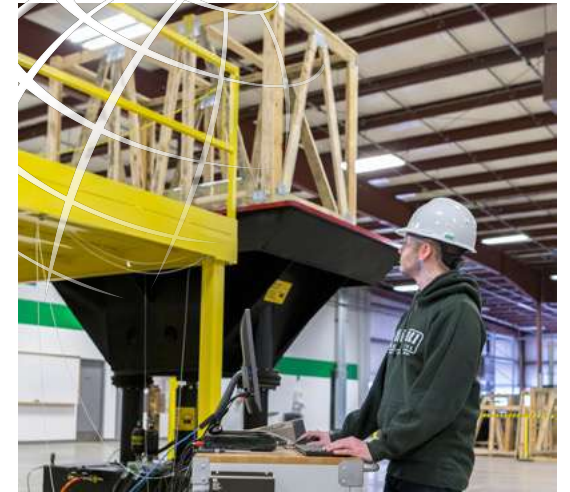

WE PROTECT YOUR PRODUCTS USING RESEARCH AND DEVELOPMENT

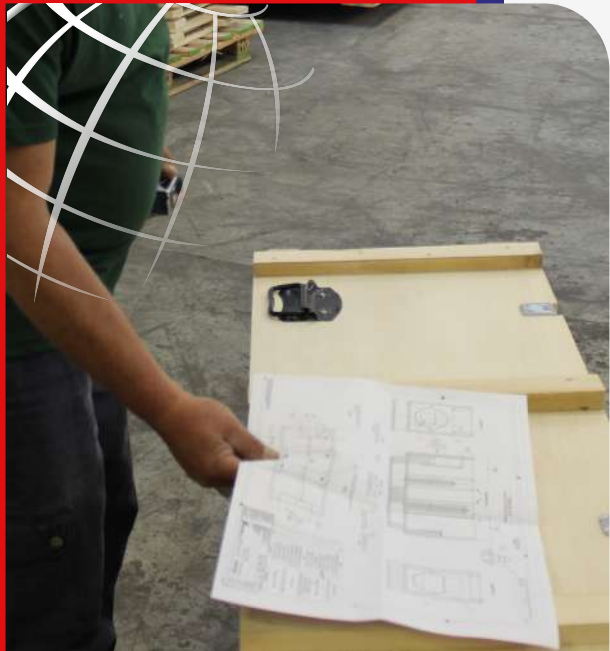

JSME LOGISTICS SERVICES

- Anagraphic management of products
- Management of incoming orders (from the platform and through the upload of CSV file)
- Management of outgoing orders (from the platform or through our e-commerce connector)
- Real time warehouse inventory with an alerting system when stock level is low
- Integration system connector for automatic download of orders from the major CMS e-commerce and marketplace platforms.

Constantly updated technological know-how, which concerns:

- the human resources employed in the design;
- the quality of the technologies in the innovation and study of the services offered;
- the excellence of the solutions, both in standard versions, then in customized solutions.

ADDED VALUE SERVICES

Design and production of packaging

Protocol development of packaging and quality verification

Qualified Technical Team

Design, Engineering and Testing

CERTIFICATIONS

Among the certification programs we recognize are the

- Sustainable Forestry Initiative (SFI)
- Canadian Standards Association (CSA)
- International Standards Organization (ISO 14001)
- Pan-European Forest Certification (PEFC) and other qualified organizations devoted to the sustainability of the world's forests, wildlife and watersheds.

Many of our facilities have Forest Stewardship Council® (FSC)® FSC-C004179 Chain of Custody Certification SCS-COC-001831.
